

# Heard It On My Radio

Brother Firetribe

I heard the sound  
I heard the sound in the air that night  
The same sound gets me through tonight  
I heard it on my radio

I remember back in '84  
Still hadn't learned the wicked ways of the world  
We needed something to fill our hearts  
Kids on the run, we had to take the charge

Well, it could've been anything  
We could've gone the other way around  
But some things were just meant to be  
We had the time, yeah we had the place

A mind-blowing revelation  
We were ready, standing on the station  
Waiting for the ride that lasts forever

I heard the sound in the air that night  
I heard it on my radio  
The same sound gets me through tonight  
I heard it on my radio

We didn't want to compromise  
We had to make the sound come alive  
Bought ourselves our first guitars  
Those were the things that made the stars shine in our eyes

Start a revolution  
Armed and ready to rock the nation  
Hitching for the ride that lasts forever

It's in the air tonight  
It makes me feel alright  
Tonight I heard it on my radio
