

## Trail Of Tears

Brother Firetribe

I can see the shoreline  
And I feel the wind in my hair  
Got my motor running  
And my hands hold on the wheel

Driving to the sunset  
With my baby by my side  
Hear the notes of freedom  
Sounds so good to these old ears

My mind was numb from working over time  
I never really found a reason why  
Those days seem to be over, they're over

I found a way, I found a new life  
Left behind the past, the trail of tears  
I found a way, I found a new life  
No more walking the same old trail of tears

I was down on my luck  
I was torn, I was blind  
Reaching for the bottle  
Drank my sorrows, sank my pain

I still recall the darkest night of the year  
And the face in the mirror  
A stranger staring back at me

Then there was you, an angel from above  
I felt your fire burning deep inside  
You just saw right through me, right through me

It was a matter of life and Death  
I couldn't set myself free  
Now you control my destiny  
I don't wanna go back, go back to yesterday
