

If You Play Your Cards Right

Brownstone

There's something on your mind
I feel it every time, I'm with you
It's what you like to do
Something I like to, let's get it tight
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
You won't have to hide what you feel inside
My love is guaranteed
Play them right with me and you will see
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything will be alright with me
If you play your cards right
Everything is gonna be alright
If you play your cards right with me
If you play your cards right
Everything is gonna be alright
If you play your cards right with me
If you play your cards right
Everything is gonna be alright
If you play your cards right with me
If you play your cards right
Everything is gonna be alright
