

# Navigate The Seas Of The Sun

Bruce Dickinson

Distant earthrise long ago  
lingers at the borders of our minds  
mysteries spinning in the dark  
in the frozen emptiness of time  
we were lost and we never knew  
who we were or what we left behind  
living half-lives we were blind  
to the new frontiers that opened up our eyes  
to find our minds were spinning  
souls entwined in a spiral dance  
the ancient ways have found us  
again to give us one last chaaaaaaance

living in this place  
staring into space we find  
we might share the corners of our lives  
infinity runs deep  
eternity that we can keep  
melting through the frozen wastes of time

so we go and we'll not return  
to navigate the seas of the sun  
our children will go on and on  
to navigate the seas of the sun  
so we go and we'll not return  
we'll navigate the seas of the sun  
our children will go on and on  
to navigate the seas of the sun

we can go on tomorrow  
living death by gravity  
couldn't stand it anymore  
we'll sail our ships to distant shores

purple gold and blue  
living colors every hue  
flowers in the garden of the gods  
no one can ever know  
if you never saw them grow  
but this darkness is really full of light

[solos]

now beyond the earth  
beyond all things that gave us birth  
we'll navigate...  
if god is throwing dice c  
and einstein doesn't mind the chance  
we'll navigate...  
infinity runs deep  
eternity that we can keep  
we'll navigate...  
flowers of our souls  
purple blue and gold we'll find  
to navigate...  
so we know who we are  
even in this frozen waste

we'll navigate...  
living in this place  
staring into space we'll find  
we'll navigate...  
well beyond the earth  
beyond all things that gave us birth  
we'll...  
if einstein's throwing dice  
and god he doesn't mind the chance  
we'll navigate...  
flowers of the soul  
purple blue and gold  
and who we were before  
eternity...  
we'll navigate...  
flowers of the soul
