On A Mission

I want to rise from my seat Don't want to be held down I want to get off the couch I want to find a new sound I want to step outside I want to say I'm alive I'm on a mission, I'm on a mission Courtesy of a condition My condition, my condition Is something that you can't see I'm just looking for a better way I'm on this mission because of my condition And its the only thing I can see Don't want to try hard to be something Just want to let it come naturally I can only see one thing and that's A bright future for me Cause you're my friends I hope you'll Never think again about my intentions on this stage Its not just what I say but its what I believe And now the only thing I now is get up & go And find my destiny I'm on a mission, I'm on a mission Courtesy of a condition I've got a vision, I've got a vision Of all the things we can do together
