

That's What They Say

Buddy Holly

There comes a time for ev'rybody
When true love will come your way
There comes a time for ev'rybody
That's what they tell me
That's what they say

I didn't hear them say a word
Of when that time would be
I only know that what they say
Has not come true for me

You just keep waiting
And love will come your way
That's what they tell me
That's what they say

There comes a time for ev'rybody
When true love will come your way
There comes a time for ev'rybody
That's what they tell me
That's what they say

I didn't hear them say a word
Of when that time would be
I only know that what they say
Has not come true for me

You just keep waiting
And love will come your way
That's what they tell me
That's what they say
That's what they tell me
That's what they say
