You and I Are Through

Buddy Holly

You said that you were leaving me You were gonna let me be But now I find you here

I loved you, but don't you love me too? But you said I'd never do Now you and I are through

I loved you then my darlin' I loved you every day But it seems my darlin' your love just fades away

You loved me but I just don't care About the new love that I'll share And you and I are through

You said that you were leaving me You were gonna let me be But now I find you here

I loved you, but don't you love me too? But you said I'd never do Now you and I are through

I loved you then my darlin' I loved you every day But it seems my darlin' your love just fades away

You loved me but I just don't care About the new love that I'll share And you and I are through

I loved you then my darlin' I loved you every day But it seems my darlin' your love just fades away

You loved me but I just don't care About the new love that I'll share And you and I are through
