Don't Go Away

Still the sound of voices whisper tenderly Still the sound of voices whisper tenderly Don't go away, don't go away

Oh the summer time, pictures in a dream Do the people play the game? And fill an empty stream When it comes to reasons for what is said and done All the lights are broken By another lonely tonight Still the sound of voices whisper tenderly Don't go away, don't go away

Sit you down beside me, light my darkened way Someone said look out for now, The future still remains Past is gone and now the day is slowly drifting by Look out my friend don't be a loser Save yourself and cry, have abandon freedom Don't go away, don't go away

Life can last a love time, open up your book Come and take a look inside this heart of mine I'll reveal behind my seal of endless words I say Pass a little love my way don't hide Only fools would turn a page And walk away from me Don't go away, don't go away

Budgie
