Everyone has their own myths

If not their father's troubles

It's the mother's kiss

But me would you save my life

Or take it away from me - stab me with a knife

Hey you could find it in yourself, I know To fly across the cobalt sky And leave me down below, I know To bend my neck and wave goodbye

You pictured in black and white - clouds stay 'til night Don't make the day look right
You in a beatnick black beret - out on a sunny day
Make the crows fly away

Hey you could find it in yourself, I know To fly across the cobalt sky And leave me down below, I know To bend my neck and wave goodbye

Hey you could find it in yourself, I know
To fly across the cobalt sky
And leave me down below, I know
To bend my neck and wave goodbye
Wave goodbye
