

In the colored light stands you  
The end is in sight - no need to fight anymore  
They're hot in pursuit and they're pursuing you  
All the way home and now you're finally alone  
All the way back home

Now you're catching dust like desire  
Stockpiling stars collecting their wildfire  
Fireworks outside - its the fourth of July  
Now I see you - you're in a different light  
You're in a different light

Like the rain when you're conscious of it  
She was sparkles  
Like a drug on the tip of your tongue  
She gives sparkles  
She was sparklers

They gunned him down outside  
How long does it take? Shots echos across the lake  
And there he stood in a puddle of his own blood  
Slighter than snowflakes earth began to quake  
All the way back home

Like the rain when you're conscious of it  
She was sparkles  
Like a drug on the tip of your tongue  
She gives sparkles  
She was sparklers

Like the rain when you're conscious of it  
She was sparkles  
Like a drug on the tip of your tongue  
She gives sparkles  
She was sparklers  
She was sparklers
