

Bad Light

Built to Spill

Never forever
What I think is true
What I hope to do
What I got from you
Never forever

Bever forever
What I think is true
What I hope to do
What I got from you
Never forever

And all that sun makes so much shine
How this is done like so much science
Can't be explained through common sense
Takes a firm background in remembering

And it takes some math
And there's so much more
It's so hard to read in bad light
It's so hard to see it bad light
