

The Rebels Return

Bullet

Listen up folks to what I'm about to tell
Beware of what we're about to do
We've been silent for long but always been strong
And now it's the time to fight back

We'll set your town on fire and leave it to burn
It will light up the night of the rebels return
Burst straight through your heart and into your soul
We're back for vengeance, we're back for you

Midnight's coming the rebels return
We're gonna make you burn

We're back to stay forever
We're back and we're rockin' all around town
This night we gonna change it all
We're back c'mon hey!

We'll set your town on fire and leave it to burn
It will light up the night of the rebels return
Burst straight through your heart and into your soul
We're back for vengeance, we're back for you

We're back to stay forever
We're back and we're rockin' all around town
This night we gonna change it all
We're back c'mon hey!

We're back to stay forever
We're back and we're rockin' all around town
This night we gonna change it all
We're back c'mon hey!
