

Step Out

BulletProof Messenger

Slow down
Although it seems that time is running out
This is a show down
Where every breath you take is a shadow of doubt
When there's no sound
Just let go of the world that brings you down
This is the low ground
But time will make the mountains come around

You fight to say but can't explain you gotta take the time to come around
Don't complicate decisions made there's no mistaking words for actions now

Take a step out
Forget about details and decisions now
Make your own route
Set your mind at ease don't follow the crowd

You need to freeze the day and ease the way for everything that tries to make you drown
Don't hesitate to make your fate, this world can be sublime just work it out

There's no sound
Just let go of the world that brings you down
This is the low ground
But time will make the mountains come around

You need to freeze the day and ease the way for everything that tries to make you drown
Don't hesitate to make your fate, this world can be sublime just work it out

Don't cast away the wrongs you've made, you gotta learn mistakes won't take you out
So activate decisions made, stand and turn your words to actions now
