

# Where We All Belong

BulletProof Messenger

This all started in a quiet town  
There's not much around but fear and emotions  
It's all alive send some cheap champagne  
Dreams are fading in civil commotion  
So breakdown I'm down on my knees  
I'm starting to see my life is hollow  
When lights go out and turn my heaven to hell  
Reality check and I'm all by myself  
And every time I know  
And every time you go  
And every time it shows it shows  
It leaves you cold it leaves me alone  
Don't stop let me drop, everything I hold's a lie  
Even though it's taking you this is where we all belong  
A long road and it's found her alone  
When so far from home  
No need to look back now  
Appeared 'fore a man a fork in the road  
The lonely stone won't stop it won't slow down  
So pass your heart down the line  
You'll give it away only one more time  
An empty soul might hide the light in your eyes  
You look so alive but you're dying inside  
And every time I know  
And every time you go  
And every time it shows  
It leaves you cold it leaves me alone  
Don't stop let me drop, everything I hold's a lie  
Even though it's taking you this is where we all belong  
Don't stop let me drop, everything I hold's a lie  
Even though it's taking you this is where we all belong  
But oh it's not my time to find out  
(So long ago tonight...)  
But motivation's best intentions  
(Only move to treat you right...)  
(Only move to treat you right...)  
Don't stop let me drop everything I hold's a lie  
Even though it's taking you this is where we all belong  
Don't stop let me drop everything I hold's a lie  
Even though it's taking you this is where we all belong
