All For Nothing

Buried In Verona

Just try and understand our claims That your mind can't remain this way If you just stayed here for the while, and listened Cause you've got everything to lose With your pride set you can't be moved If you just faced us that day you'd be here You always knew when you walked away No forgiveness You never cared what you threw away No forgiveness This feels like forever and its eating us inside With hopes script ending We will wait for you
