

Go Go Gadget Suicide

Buried In Verona

Wake the fuck up. Your life is slipping day by day, enough is enough

In the times that I surrendered, I can never take them back
So I'll burn though the white flag, raise my fist and hit you back

You tore the boundaries moved the line, you moved the line
You, you speak with silence. When you preach your contradictions override

You speak with silence. Shroud the lies, you hide behind them until you find

You can fucking run, but you can't hide

Release the hounds. Make sure the night takes justice

Now I'll break you. I fucking hate you. I see the fear in your eyes

Self destructed. I'd fucking pay to watch you fall from grace

Gooo...

Wake the fuck up. Your life is slipping day by day, enough is enough

Now to see you rot

Now I'll see you rot

You, you speak with silence. When you preach your contradictions override

You speak with silence. Shroud the lies, you hide behind them until you find

Now how the fuck does it make you feel?

Now how the fuck does it make you feel?

Now how the fuck does it make you feel? Your world is caving in

Now how the fuck does it make you feel? You've lost all that you loved

Now how the fuck does it make you feel? I'm standing right behind you

Now how the fuck does it make you feel? I'll stab your fucking heart

Now how the fuck does it make you feel?
