

Earthbound

Bury Tomorrow

Do you remember the time
When we look to the stars at night
Do you remember the lies
Snort out the poison, break up the lies!

You belong to all the surroundings
Stabbing you and all that you know
This will be the end of us
All blood and avenging glow

To live to feel the end in motion
I can see there's much hope in changing in this world
But no one's listening
We've been living a lie so long, in denial
Like whispers to my ear

Earthbound! We are shackles to the same ground
Our hope, one chance
Earthbound! We are shackles to the same ground
Our hope, one chance

This is the falling of future
Don't think I nearly lose it
We must be better than we've ever shown
For your, for resolution, losers, stretched out too much!
Don't bring life into a dying sun!

To live to feel the end in motion
I can see there's much hope in changing in this world
But no one's listening
We've been living a lie so long, in denial
Like whispers to my ear

We were given one chance to make this world our own
We were given one chance to make this world our own

Don't let this become
Desolation over it all

Desolation over all

To live to feel the end in motion
Is all I need
I can see there's much hope in changing in this world
But no one's listening
We've been living a lie so long, in denial
Like whispers to my ear

Earthbound! We are shackles to the same ground
Our hope, one chance
Earthbound! We are shackles to the same ground
Our hope, one chance
