

Sky Turns Day Glo

Bush

Now the stars keep fading
We see the world we know is changing
The future is under attack

Only love can save you
You're the sea with all your mysteries
You are broken, let me fix you
Don't bleed (yeah, yeah, yeah)

The earth keeps burning
We're digging the planet graves

Sky turns day glow
The ice runs so low
The polar bears are weeping
It's hard to fix a hole

There are no trees where the storms have been
There's no rest where the heart has been
I see you, I feel you inside

Don't turn your back on me
These are delicate days
We nearly lost you there, broken satellites
Future's so much more than diamonds, yeah

The earth keeps burning
We're digging the planet graves

Sky turns day glow
The ice runs so low
The polar bears are weeping
It's hard to fix a hole
And the night got so cold
It's fading fast while
The future is now
It's always been

There's a killer on the run
There's a killer on the run
There's a killer

Sky turns day glow
The ice runs so low
The polar bears are weeping
It's hard to fix a hole
And the night got so cold
It's fading fast while
The future is now
It's always been

The future is now
It's always been
Sky turns day glow

The future is now
It's always been

Sky turns day glow
Sky turns day glow
