

Straight no chaser

Bush

always be there face i live with
always be there face i live with
abscess memory with broken fingers
all the fallen down angels
raw pain distress

it's all
in the way we know
that we could have it all
some
some satellites of pain can't always be ignored
war on all sides
war on all sides

drink life as it comes straight no chaser
straight no chaser
drink life as it comes straight no chaser
climb inside you away from strangers
building a system of alleys and motorways

it's all
in the way that we know we could have it all
some
some satellites of pain can't always be ignored
it's all
in the face of what we thought
we knew before
war on all sides
war on all sides
war on all sides

keep on driving
hair left morning wet
there's nothing like losing you
It's nothing like losing you
It's nothing like losing you
It's nothing like losing you
It's nothing like losing you
