Back With You

You help me sing my song Now it's easy to carry on And it won't be long before I'm back with you I'm back with you

The things you make me do now The things you make me do, yeah The things you make me do now The things you make me do, yeah

The difference between right and wrong And those feelings seem so strong And it won't be long before I'm back with you I'm back with you

The things you make me do now The things you make me do, yeah The things you make me do now The things you make me do, yeah

The things you make me do now The things you make me do, yeah The things you make me do now The things you make me do, yeah

The things you make me do now The things you make me do, yeah The things you make me do now The things you make me do, yeah The things you make me do now The things you make me do, yeah The things you make me do, yeah The things you make me do, yeah The things you make me do now The things you make me do, yeah
