We all will dance (Th. Tol/J. Tuijp/C. Tol)

It's Fridaynight
The citylights are calling me again
It's you, nothing but you
I wanna be with you and then

We get into a fancy car And head out for a race We all have a good time I see a smile upon your face

And when it's getting late
We're gonna stop and take a break
I'm gonna kiss your lips-a
Because I love, love, love you tonight
And I take you to the discoshow
Where we all will dance

It's summertime, the wind is right
I'd like to sail away
With you, only with you
Having a bright and sunny day

And we will be the winners Of the oceanrace today Come on, let's have a drink And let us sing hurray hurray

And when it's getting late
We're gonna stop and take a break
I'm gonna kiss your lips-a
Because I love, love, love you tonight
And I take you to the discoshow
Where we all will dance

Well holidays are here again So no more working days It's you, nothing but you Only with you I'll fly away

We're gonna make a trip Just like we did the U.S.A. We all have a good time Down on the beach of Saint Tropez

And when it's getting late
We're gonna stop and take a break
I'm gonna kiss your lips-a
Because I love, love, love you tonight
And I take you to the discoshow
Where we all will dance
