## **Virtual Escape from Tragedy**

## Cadaveria

Feel the frequency Perceive your pulse Trust the ideology To capture the ancient secret of life. I'm looking for the antidote to myself I'm working for my heart's freedom To rid myself of the other side of me. To rid myself of this virtual escape from tragedy Hypochondriac creature Disturbed by his memory One single disease to cure But you think of the rest. It's not as tragic as you believe Just free your mind of fears, life is pulsing. Just feel its frequency. Life is pulsing, just feel it. Just feel the frequency of this virtual escape from tragedy.
