

I'm Still Here

Cady Groves

It's been too long
Since I've been home
I can't help but
Bringin up a memory
Of you and me
Whoa

Once you opened up
And let me in your polaroid
Couldn't wait to wake up
Put on my makeup
And hope that you would stay
I just hoped that you would stay

I cant shake you off of me
And I cant be here
And help but think
That you should be next to me
I scream your name
I don't know why I care
Oh I'm still here

It's been too long
Since you been in my arms
And even though I know
You're the one
I feel space tween
You and me
You and me

Cause once we opened up
And let them see who we were
Couldn't wait to wake up
Put on my makeup
And hope that you would stay
I just prayed that you would stay

I cant shake you off of me
And I cant be here
And help but think
That you should be next to me
I scream your name
I don't know why I care
Oh I'm still here

Why would you set stone?
If you don't really love me-
Baby its so cold
I gotta let you go
Cause you don't really love me
And it's apparent every time I come back home
And ooh
I'm gonna be alone forever
I just need to breathe
Let me breathe again
Let me see it when
I gotta see you

I gotta see you again

I cant shake you off of me
And I cant be here
And help but think
That you should be next to me
I scream your name
I don't know why I care
Oh I'm still here
