Prince Valium

You disappeared Into thin air Went up in smoke And now you're here

It's not about Helping you out No psycho-tool Will ever do Just come on out of your piggysty and explore

You disappeared (I know that it's about) Into thin air (I couldn't help you out) Went up in smoke (I know that it's about) And now you're here (I couldn't help you out) Come on out of your piggysty and explore

Had a dream tonight where you were walking in my room Jumped up tried to hit the light but I fell right through the f loor Something told me I would never find you anymore What a scary feeling to be left here all alone Had a dream tonight and it was wrong

Come on out of your piggysty and explore

Caesar
