Rocket

Caesar

Does anybody know this illness that I've caught
I feel so devastated like I haven't slept all night
And oh what I've got has paralysed my thougths
Somebody reassure me that I'm gonna be all right

Oh, I wanna see you tonight
You gotta know what a fool can cover up inside
You gotta know what I'd do if that would make it right

Just every now and then it comes to me again
It comes to me and puts me in the middle of it all
And oh when you know, don't tell it with a blow
Somebody reassure me that I'm gonna be all right

I wanna see you tonight
You gotta know what a fool can cover up inside
You gotta know what I'd do if that would make it right
You gotta know what a fool can cover up inside
You gotta know what I'd do if that would make it right
