After Death Still You Play With Me

Cain's Dinasty

Digging a hole in the depth of my brain Searching a place where I'm not insane Making a ditch on a quest for the bitch To spit in her face and make her burn like a witch

Open my mind, open her grave Welcome to hell, this is my past

I can't believe that after death still you play with me I can't believe everything what I had to feel He observes the world which caused him so much pain A well of madness surrounded with loneliness

Then I had faith and then I believed and Looking for a disguise to conceal my pain

There's a void in my head, there's a sin in my soul There's a feeling inside me, there's a price to pay

Madness, desperation still grows in my brain Now the hole is deep and bleeding memories Burning the past and burning myself They come for me, the beasts of pain are unleashed

Open my mind, open her grave She excused my life, But broke all my hopes

I can't believe that after death still you play with me I can't believe everything what I had to feel He observes the world which caused him so much pain A well of madness surrounded with loneliness
