

My Queen Of Winter

Cain's Offering

When the darkness has grown strong
And the nights they feel so long
Like the sun has slept too long
Just waiting winter's waining

Blow out the candle and unleash the night
Open the door, let the cold inside
My heart you have captured
Don't shatter my rapture
Don't leave all my dreams to decay

All of my life I've been waiting for someone
To share all my kingdom with me
The silence unbroken, words left unspoken
Sign across my heart your name
My Queen of Winter, this is where you reign

You are the daughter of warm summer breeze,
I am the firstborn of winter
Chill in your spine and the howl in the night
I am the frost in your heart

Get up, get up, get up, get up
You're never gonna give up
How could you feel love if you cannot hate
How could you feel joy without pain

All of my life I've been waiting for someone
To share all my kingdom with me
The silence unbroken, words left unspoken
Sign across my heart your name
My Queen of Winter, this is where you reign

Sleep can be eternal
Underneath the veil of stars
The caress of the first snow
Feels so soothing on our scars
Stay forever here beside me, slumber peacefully
Through the years my heart will belong to you
And you belong to me

All of my life I've been waiting for someone
To share all my kingdom with me
The silence unbroken, words left unspoken
Sign across my heart your name
My Queen of Winter, this is where you reign
