## No One is Safe

No one is safe No one can hide It can happen to anyone at any time When you cross a street Or when you go to school Destiny Is all around

Today could be the last day of your life Take a break, enjoy the day Don't throw it away

Today could be the best day of your life Planets collide Watch it with a smile And do what brings you joy

Enjoy your life before it's too late Every second something bad can happen In the end you don't wanna look back into nothing

Accidents are everywhere and happen all the time Don't you dare to think you're safe Just because you watch your steps

Today could be the last day of your life Take a break, enjoy the day Don't throw it away

Today could be the best day of your life Planets collide Watch it with a smile And do what brings you joy

Enjoy your life before it's too late

Today could be the last day of your life Take a break, enjoy the day Don't throw it away

Today could be the best day of your life Planets collide Watch it with a smile And do what brings you joy

Enjoy your life before it's too late Enjoy your life before it's too late
