

Last Parade

Call Me No One

Just a sign of what's to come - open mind that's on the run
Where's the time - what's the rush -
Forgive yourself - save your breath - shut your mouth and just
play dead
This fight is yours and yours alone

You're way too late for my devastation
You're all to blame for my desperation

Curse the one who loves himself - the only one that ever cared
We demonize the real unknown -
Ask myself - should I believe - or stay caught up in your disease
The choice to make is ours no more - no more no more no more

You're way too late for my devastation
You're all to blame for my desperation

The sick - the coarse - the frail - the weak - the ones that kill
you while you sleep
The stricken down - the ones who fails - the hand that lifts you
straight from hell
They're all the same to me - they all the same to me They're all
the same
We're all the same

You're way too late for my devastation
You're all to blame for my desperation

You're way too late for my devastation
You're all right here for my last parade
