

Deception Never Looked So Good

Camisado

One day you'll come crawling back to me
And when you finally do
We'll be seeing eye to eye
Because I never stopped crawling back to you

Your eyes look worried
A look all too familiar

And it's not like you
To be just like you

You looked my right in the eyes
And said it would be alright
I should have never believed those lies
I should have seen it in your eyes

You leave my eyes starved and begging for more
Deception never looked so good before

It looks like there's a liar among us
Someone is not who they claim to be
"I hope they don't know it's me"

No matter how much I push
I know that I loved once
No matter the walls I put up
I know I was loved once

So even through these dark days
Though it may be hard to see
I know out there somewhere out there
There's a light that's just for me

Here lies the most beautiful soul I've ever known
