

Let the hadrons collide!  
Chaos boils down to a theory  
Of the random acts that take place  
Not aligned not inclined to the prediction  
'Cause I know that even asteroids can burn

Yeah lay the blame as you will  
But there's forces far beyond nature  
That law, that draw called gravity  
Don't even get me started on light

Divided we fall apart, there's safety in numbers  
Put my faith in the stars, in the cosmos

Action conducts a reaction  
Every blackhole starts from a star  
They shatter that matter goes 2D  
Ah I think I need to re-read that part

Yeah that night on the highway  
When we both saw the hadron collider  
I swear right there our minds were blown  
I didn't even know what it was

Been space invaded, had that mother blow my mind  
Been space invaded, it happens to me every time

There's eleven dimensions  
In a brief history of time  
Blackholes aint so black  
Past, present and futures collide  
There's eleven dimensions  
In our brief history of time  
Elementary particles  
Let all the uncertainties ride

Let the hadrons collide!
