

Let It Pour

Cancer Bats

Huh!

Here comes the rain

Pouring down on you, pouring down on me

Darkened skies

Block out the light, yeah

Let the rain pour down

This water, this pressure still rising

This water, this pressure still rising

Here comes the storm

Crushing down on you, crushing down on me

Endless clouds

Turning days to night. Yeah,

Let the rain pour down

This water, this pressure still rising

This water, this pressure still rising

And there will be no sunshine

For 100 days

We're all here drowning

There will be no sunshine

Everyday just rain

We're all here drowning

There will be no sunshine

Everyday's the same

We're all here drowning

This water, this pressure still rising

This water, this pressure still rising

This stress will be the death of me

This stress will be the death of me
