Kill Me

Cancerslug

And it's all good when the body hits the ground
And it's all good when there's bodies all around
You fuck with me, I'll put you six feet down
And I don't care if your body's ever found

So die with me all night

I hate myself and I wanna f**king die
I hate myself, I don't even know why
You fuck with me, you will lose your life
And I don't care if anyone survives

So die with me all

Go ahead, take my life, just take my pain (with it)
Go ahead, take my life, just take my pain (with it)
Go ahead, take my life, just take my pain (with it)
Go ahead, take my life, just take my pain (with it)

Go ahead, take my life, just take my pain
