

Mistress Death

Cancerslug

Mistress death don't you leave me alone
I am so sick of waiting
Wont you take me home
I don't know what they are trying to prove
But they have already shown me that I could be used
Mistress death don't you leave me this way
I don't know what you want me to do or to say
Im sorry that I left you behind
But you surely must know
You were always on my mind
Mistress death please remember my name
How I called to you in those nights filled with shame
Release me from lifes bitter grip
And into that sweet slumber let the two of us slip
Mistress death you are a whore sometimes
Why wont you stay out of my life
Please save me
