

## The Sleep

Cancerslug

Death of mother nature  
that bitch deserved what she got  
greenhouse teeth eat a world of rot  
a sticky situation  
the kind you have always known  
dont you want to let it go?  
hold me close and let me die  
hold me close and lead me to eternal fire  
so I can burn a little while  
sing a song of hate and let it burn down
