

# Lifelike Song

Candlebox

Oh, our dreams they fade away, just like this well worn devil  
Left behind on an endless dusty road  
And our pockets are empty, they're showing signs of aging  
But we dream on every road through this song, yeah

Oh, our hearts they skip replay, no rewind no direction  
Like a feather to the wind as we go  
And our lives are not empty, still we want and we beg, yeah  
Where we could just live our lives through this song

We're all just searching for love, we're all just searching for a har  
mony  
Are you singing loud, are you singing everyone?  
We're all just searching for love, we're all just searching for a har  
mony  
Are you singing loud, are you singing everyone?

Can we tell the truth lies, can we smile through it all?  
Slipped into revelry through its soul  
And our feet they dance away, lost in all this elation,  
All this key to this life in a song

We're all just searching for love, we're all just searching for a har  
mony  
Are you singing loud, are you singing everyone, yeah?  
We're all just searching for love, we're all just searching for a har  
mony  
Are you singing loud, are you singing everyone, yeah? Wooo!

You gotta open your mind, and lose the jealous heart  
Did no one teach the sharper the tongue, the deeper the scars?  
Get out of there, and let your life start  
Get out and make it louder, get out and search for your part  
It's all a harmony, yeah  
It's all a harmony, yeaaaaaaaaaaaaaaaaaaaaah!

Oh, it's all a harmony, yeah

Come on now, come on, come on, yeah

Oh, we're all just searching for love  
We're all just searching for love, yeah  
We're all just searching for love, uhh  
We're all just searching for love  
Don't let your dreams fade away, no  
Don't let your heart skip replay  
Get out and make it loud brother  
Sing it louder each day  
Are you singing loud now? Are you singing loud now?  
Are you singing loud now? Are you singing loud now?  
Are you singing loud now? Are you singing loud now?  
Are you singing loud noooooooooooooooooow, yeah?
