

# Levitibus

Canibus

"You want power, but you're not big enough  
So you steal it piece by piece.  
Take it in spoils, and step by step you'll weaken and the power is gone"

Levitibus..

I wanted some power of the chakra  
With mofulean darkness describin' what I see in the process  
Stone statues surrounded by neolithic objects  
Ceoglyphs on the pompa  
A dose of the palamine, niggaz will feel like a dream  
The dream state is the playground for the supreme  
Critics attempt to follow a trend  
Today they call me a Charlotten but tomorrow I will be a God of men  
To create a universe all I need  
Is 1000, trillion, trillion degrees  
So with 22, betatrons in the cloud chamber  
Keep the noise down so I don't arouse my neighbors  
Got a message from the falcon in the snow man  
Another note in a Coca Cola can  
Showed the whole planet in coded program  
Enrypted by a pro-scan modem with a low band  
Hold up, let me load it in

"Darling I am a scientist..(you're a person, you ought to think that)  
None of this is able to work without an army.. (there's no need)  
vaporizin' my spit and turnin' liquid to gas"

I was created by intelligent design  
You are merely a descendant of the unmodified  
You diss me out of pride  
But when you're finished talkin' bout one of your bitches you're simply out  
of rhymes  
Even my worst album was sublime  
If I don't slow down, I'll distort the timeline  
Back through the time, turned into a 100 bars again  
A master like the honorable Earl of Cannaben  
The grand architect  
Used to be a partisan to LeMarketson's theory but I lost the bet  
No regrets, you live and you learn  
I'm through givin' advice, I just give concern  
Sterilize my hands to prevent catchin' the germs  
And try to rebuild all the bridges I've burned  
I prefer modesty over controversy  
But what am I to do when these jerks keep botherin' me  
Jealous 'cuz they cant rhyme like me  
And they never had a scientific mind like me

"Darling I am a scientist..(you are a person, you ought to think that)  
None of this is able to work without an army.. (there's no need)  
vaporizin' my spit and turnin' liquid to gas"

I'm above average with verbal semantics  
The aurora borealis in the form of a rap ballad  
You look at me like "poor bastard  
Why cant you manipulate billboards with all your metaphor magic?"  
No matter how hard I practiced

Every microphone I sorta grabbed it  
Obviously that's the wrong tactic  
I went through a long period of mourning and sadness when I wrote that Stan  
shit  
But if you wanna see some hardcore Canibus just say so  
And I'll come out the egg roll with seven death scrolls  
If you can find a better flow?  
Then I can find a dinosaur on the Galapagos archipelago  
Hey you shouldn't fall for the naivette  
Lyrically I'm the illest when my beats is ok  
Food for thought, nutrition for the whole brain  
Keep your neurotransmitters warm on a cold day  
I'm ahead of my time, or so they say  
I guess that's why I already feel old and grey  
Okay, that's enough knowledge for today, I'm killin' em  
You best not forget it 'cuz this is Levitibus

"Darling I am a scientist..(you are a person, you ought to think that)  
None of this is able to work without an army.. (there's no need)  
vaporizin' my spit and turnin' liquid to gas"
