

Gutted

Cannibal Corpse

A table of the deranged, this savage brutal being
A shocking way of life living on human offspring
Murder of the innocent, his pale grey face expressionless
Horrid dismemberment

One persons tortures, is anothers pleasure

Malformation, a diseased brain

Unsuspecting slowly dying, as his knife invades

The child, screams of pain, no one hears

Blood splotches now appear, ecstasy through

Each cut, now the body twitches the gutted

Little torso ready to be cooked

Isolated in his own mind the need to kill

Now possesses his body

Self mutilated

Between killings ejaculation, cut off appendages

Of former victims, sexual violence satisfaction

Disembodied corpses, spewing gore

On his body, soaked with their fluids, various

Digestive parts, and assorted meats

Plunging his fist down the throat, ripping out

The guts, internal extraction

The entire body bleeding

The heart stops pumping

The child lying dead, just another gutted infant

To satisfy his hunger, temptations of the flesh

Voracious appetite

Killing to release pure souls to the heavens

Justification of his killing self-torture

Stiffening pain

He sees the faces of the dead

Guts are strewn from the children

Splintered bones, poke through skin

Gratification through castration

Roasting parts for consumption
