

Diver

Canterbury

Nothing but air's in the way
And it feels like it's already below me now,
Below me now
I would come down, but you should come up.
You should see this view from up here, seems endless now
Seems endless now

So I'm straight out of the sunset baby and you're falling behind,
But I'll keep you in mind while I run.
There's no use trying to catch me up
But you'll be in my mind every time I look back at the sun.

The things I'm forbidden to see
Have been moved into the light that seems to surround me now
Surround me now
I'm on fire when I'm in the sky, if you hold on
I'll teach you to fly, but I could burn us alive
I could burn us alive

Straight out of the sunset baby and you're falling behind,
But I'll keep you in mind while I run.
There's no use trying to catch me up
But you'll be in my mind every time I look back at the sun.

It's getting crowded round here
But I feel like a deep-sea diver, a deep-sea diver
So I'll swim back into the emptiness where I think I'll spend some time.

Straight out of the sunset baby and you're falling behind,
But I'll keep you in mind while I run.
There's no use trying to catch me up
But you'll be in my mind every time I look back at the sun.

It's getting crowded round here
But I feel like a deep-sea diver, a deep-sea diver
So I'll swim back into the emptiness where I think I'll spend some time.
