Wrapped In Rainbows

Canterbury

I see myself and you wrapped in rainbows
A curve of colour swirling round my head
I'm from a cloud, I have been falling for ages
Passing through the light into the ground

I'll wait, I'll wait for you
While all the world is falling out of love

Wrapped in rainbows, peeling off my layers of skin for you
The layers that help me through, now I'm see-through
Oh what a shame though! I didn't bring down all these things fo
r you,
All these colours, for you, colours to see through

I'll wait, I'll wait for you
While all the world is falling out of love
I'll change, always for you
Showing my colours as I hit the solid ground

Catching raindrops, I am the light that splits them into two
Making them shine on you, watching you while you step out of th
e rainbows
You're just a dull and lonely point of view
With no reds and blues your colours are see-through

I'll wait, I'll wait for you
While all the world is falling out of love
I'll change, always for you
Showing my colours as I hit the solid ground
