

You Will Rise Again

Capercaillie

Cold December dawn
The party's over and the thrill is gone
Tears are at your feet
They're running down the empty street

But I know for certain
Every time you fall
You will rise again
Above it all

Fly the way you do
The way you dream when love is new
Try to understand
It couldn't last the way you planned

And I know for certain
Every time you fall
You will rise again
Above it all

You'll wake to a different drum
In a place to call your own
Your world is shaking but a day will come
For a dream to take you home

But I know for certain
Every time you fall
You will rise again
Above it all
You will rise again
Above it all...
