

# Save The Children

Cappadonna

Whateva, whateva man  
I'm here to represent G-O-D to the fullest  
I got a message man, and the message is straighten up  
Or get eatin up

All mighty God is with us (2x)

Save the children, these streets is like a villain  
Life is like a chop shop inside of the buildin  
Save the children, these streets is like a villain  
Save the children, let the blood stop spillin

Roses are red, violets are blue, this life is about me and you  
Not the red, white and the untrue, together we stand  
Divided we stand tall, final call, God save us all from the gates of Hell  
Where my young family dwell, it was a tall well  
While we still suffer, days are gettin tougher  
Jake on the prowl, treatin people on the street foul  
Some of them mean well, but they all live behind the shell  
Kick my door down, without ringin my bell  
Claim I'm sellin crack, but I ain't doin that  
All I do is rap, I'm a real MC, trynna get my life back  
Devils'll make it difficult, there it glow within the cult  
Can't wait to cut my throat, cuz of how I speak  
Too black for Hot 97, last year they put me on hold  
But I still went gold, where the joy go?  
What happened to the Black Boy video?  
Bring Run back, y'all scared of Cap  
Sleepwalkers can't roll wit the blacks

See the man dem him, he went from nice to true drunko  
Now me speak the truth and a man just a den dead  
Wit the children, when I told you I be on the outside  
I can't trust with him, not pity on the outside  
I'm hung it with him, tell him that I carry  
Tell dem save the children  
You sold your bread, I so
