Long Way Home

Capricorn

The highway's where I'm livin', The road is where I dream Staring at that white line Back home is where I wanna be Missing all the women The best that you can get Thinking of my buddys At the pubs that I like best Day after day, mile after mile Sleepless hours. I drive all night The radio plays the sound I like Pouring beer by beer as time goes by It's an endless highway Such a lonely road Got miles to go It's a long way home Long way home

Colleagues on the CB
Two weeks the same old joke
Nothing new to turn me on
Can't even smile no more
