

Snowfall Music

Carbon Leaf

Nighttime bridges breathe
Ebb and flow
Cars blink by like a metronome
As the head for home

City glows up into the sky
Winter ribbon clouds
Melt down into grey sky night
Electric with light

And if you're burning like a candle all alone
And if we're burning like 2 candles
With no window to call home
Let it snow

Nighttime evergreens. Fade and glow
All the kids smell snow...it will fall
The kids know it all
Night sky. City sleep
Snow globe halos on the lamps in the street
Ebb and Flow. Fade and Glow
And you never know. You never know

If you're burning like a candle all alone
And if we're burning like 2 candles
With no window to call home
Let it snow. Let it snow over everything
When you hear the sound
Let it snow. Let the snowfall music
Snow its feathers down
