

Winter's Dream

Carbon Leaf

I just dreamed what it's like for me to be dead
My icy body sunk in a black lake
With the leaves swirling around me
The fall can leave such a bad sting in the water
My dream ended my life because
No stays for the winter
All these dreams never really meant that much to me
Always brings a hand of security
My life was spare because it was only a dream
Suffice to say the water was not as cold
As the vision is old
God why can't things live when it is freezing?
Irony when I'm forced to my cave when
It's my favorite season
I don't want to freeze
Something's missing
