Maggot Colony

Carcass

Oozing chyme reeks as your duodenum is hacked Secreting gastric juices, enzymes melt your faecal tract Torn major arteries, your corpse with blood is drenched Your mouth is ripped inside-out as your oesophagus is wrenched

Maggots and grubs bore into the mouldy remains Masticating lymph, caked blood and cankered decay Maturating brains play host to the grisly fete Stuffed anal passage, served on a plate

Purulent torso is a perfect maggots meal Spilt cerebrospinal fluid is sucked up with zeal Botulism vitiates the emulsifying bile Liquidized gall bladder, viscid pus smells vile
