Sandy

Now I'm divided Like a flock of birds when excited And picture circles in the sky You can't believe me Like all of the others who leave me And feel their shapes across the aisle

Twirl things around us And the shadows they left as they found us Or running fingers through your hair It's life that ended and the tracks that they left as they asce nded They'll picture circles in the air

Sometimes in her eyes I see forever I can't believe what we've found I know in time we'll be together And now our love will make this sound

Now I'm divided Like a flock of birds when excited And picture circles in the sky You can't believe me Like all of the others who leave me And feel their shapes across the aisle

Sometimes in her eyes I see forever I can't believe what we've found I know in time we'll be together And now our love will make this sound

Sometimes in her eyes I see forever I can't believe what we've found I know in time we'll be together And now our love will make this sound Caribou
