

Want More

Carina Round

It's not me
I'm representing someone who died during the conversation
Sharp tongue
You just had to let it loose
Start the incision

There's nothing you do that's worth the price i pay
And my heart moves south every time you open your mouth

Get up
Tell me what you want to do
Make a decision
Stand still
Caught up in the middle
Of your panic revolution

What was it that you said that changed the world
You were so far behind that nobody heard

I've got everything that I need right here
I've got everything right here
But I want more
I want more
