

Let Me Know

Carl Thomas

I remember the day back when I first met you
I was not sure just on how to get you
Now I see just how truly special you are to me
And your love is everything

Time and time when I sit and wonder
Just where you are and just how you feel
And I pray this love will always stay together
Oh, so we can see yeah, if this thing was meant to be

Because the last time I ever thought I see you again
Was the last time I thought I touch your body again
You come back to me after the things I did
Get out my life and now you're back again

I just got the message that you called me
You said that you'll be coming back around
Maybe we can try to make things better
Just work things out

I know people go through many situations
It's the ups and downs of love tribulations
They say good things come to those with patience
So let me wait because I thought this was the last time

Because the last time I ever thought I see you again
Was the last time I thought I touch your body again
You come back to me after the things I did
Get out my life and now you're back again

As we dance so closely on the floor
You pull me closer tell me so
If you love me let me know or let me go
Let me go

As we dance so closely on the floor
You pull me closer tell me so
If you love me let me know
If you love me let you know
If you love me let me know or let me go
Let me go, let me go

If you love me, it's so good, if you love me
