

# Light of Your Love

Carlene Carter

There's a little band  
reeling in my head whenever I see you smile.  
I could kiss and tell if there's more to this one kiss  
that I could tell

We could fall all in love,  
baby let's fall all in love

Something like nothing  
that I've ever felt is moving inside of me.  
I could kiss and ask if this love will last one kiss  
that I could tell

We could fall all in love,  
baby let's fall all in love

I wanna live in the light of your love  
Starting right here now today,

Live in the light of your love  
Darling just show me the way.

I wanna live in the light of your love  
Shine like the stars up above,

I wanna live in the light of your love  
Live in the light of your love.

There's not a sound in this whole wide world  
I couldn't whisper in my ear.  
I can hear your heart speak straight to mine  
it's beating right on time

We could fall all in love,  
baby let's fall all in love.

I wanna live in the light of your love  
Starting right here now today,

Live in the light of your love  
Darling just show me the way.

I wanna live in the light of your love  
Shine like the stars up above.

I wanna live in the light of your love,  
Live in the light of your love.

I wanna live in the light of your love,  
Live in the light of your love.
